

COMMERCIAL SERVICES

Gettle Incorporated presently serves over 100 businesses throughout the Mid-Atlantic region.

BOYDS BEARS Ltd. **Gettysburg, PA**

Boys Bears Ltd. Is located in Gettysburg, PA. The 115,000 square foot retail facility boasts a lower level food court area as well as a family-style restaurant. The first, second and third floors promote general and seasonal displays of Boys Bears products. The fourth floor is used for office space and display design. The facility is served by a secondary metered 2500 amp, 277/480v electrical service. Electrical distribution is handled by electrical rooms at each end of the building on lower and upper floors. Lighting throughout the facility is designed to meet the needs of each particular area. Low level recessed fixtures and wall mounted incandescent fixtures illuminate the lower level eating areas while fluorescent downlights and lay-in fixtures illuminate the higher levels of lighting required in the food prep and servicing areas. The retail areas have low level 2x2 fluorescent lighting in an open grid, false ceiling with a black background. Lighting of the merchandise, with the use of over 700 incandescent track fixtures, is accomplished by a track lighting layout the enables the customer to change display layouts without requiring electrical rewiring, just moving track fixtures. Included in the electrical installation is a voice evacuation fire alarm system, a multiple level card access system for employees and a CCTV system with 16 cameras located inside and outside the building. Electrical work on the site included parking lot lighting, building façade lighting, a pavilion, multiple services for signs at roadway entrances and a sewage pump station and support building.
