

DATA COMMUNICATIONS

Gettle Incorporated presently serves over 100 businesses throughout the Mid-Atlantic region.

BYERLY HALL MILLERSVILLE UNIVERSITY Millersville, PA

Replacement of the existing CAT3 and CAT5 cabling with CAT5e enhanced grade cable. This two-story building incorporates one MC to which all the horizontal cabling terminates. There are a total of 500 CAT5e for voice and data and 95 RG6 quad-shield CATV coax cables throughout the facility. A 350-pair telephone backbone, four RG11 CATV coax and a 12MM/12SM hybrid fiber optic cable connects the demark to this MC. The MC consists of eight open relay racks, each with two horizontal wire-management brackets. Above the racks and in the ceiling of the MC, the cables are supported on cable tray. In the rest of the building they are supported on j-hooks. The CAT5e cabling is terminated on AMP ACO at the workstation and Krone highband blocks in the MC. Each voice and data cable was certified to CAT5e specifications.
