

PANEL FABRICATION SERVICES

Gettle Incorporated presently serves over 100 businesses throughout the Mid-Atlantic region.

MELLOTT ENTERPRISES WARDFORDSBURG SAND PLANT Wardfordsburg, PA

Gettle Incorporated provided Allen Bradley's newer technology controller. The processor used was based on the Control Logix platform. The scale integrators as well as the ultrasonic controllers were also housed in this cabinet. Individual fusing was provided for the outputs to the field device. Relays were used on all outputs to act as an interposing relay. This was to isolate outputs from outside the cabinet from the electronic output cards used with the Programmable Logic Controller (PLC).
